An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Schmidt on November 2, 2006.

In the specification:

On page 3, line 26 and page 21, line 21, before "correlation" - - direct - - has been inserted.

In the claims:

In claim 1, line 11, before "correlation" - - direct - - has been inserted.

In claim 3, last paragraph, "can be " has been changed to - - is - -.

In claim 3, last paragraph, before "correlation" - - direct - - has been inserted.

The following is an examiner's statement of reasons for allowance: Applicant's full translation of JP 61-37516 is appreciated and has been reviewed carefully. It is evident that function timer 114 is acting as a primitive load detection device in view of the fact that on page 13, second full paragraph of the translation other temperature dependent load detection schemes may be substituted. None of the prior art taken alone or in combination teaches the use of a downstream evaporator temperature (or a

directly correlated temperature) used in the claimed manner in this type of system. The term "direct" has been inserted in the specification and claims because it is inherently supported by the original disclosure and defines over the alternative load detection schemes disclosed on page 13, second full paragraph of the translation of JP 61-37516.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John K. Ford whose telephone number is 571-272-4911. The examiner can normally be reached on Mon.-Fri. 9-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl Tyler can be reached on 571-272-4834. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
